

IT CAREER BUILDER PROGRAMME CASE STUDY

Clare Baker

Job Title: IT Apprentice*

Employer: BAUER Technologies Ltd

Why did you want to get into the tech industry?

I've wanted to work in the industry for a long time, but the opportunity never presented itself, until last year. It's something I enjoyed as a hobby and loved the idea of making my hobby a career.

How was your experience with the IT Career Builder course and what did you enjoy most?

The experience was a very positive one, not only was I learning about IT, but how to write a useful and readable CV. It was good to get a feel for the different pathways within IT too.

What will the Level 2 Diploma do for you and your career goals?

Coming from a career in the care industry my CV did not speak to my IT skills, so I really needed to find something that would help me steer my CV in the right direction. The level 2 definitely helped me to gain the position I have now. Also, with the help that my tutor gave me in how to write a skills based CV gave me confidence to not just rely on my work history.

Would you recommend the IT Career Builder Level 2 Diploma?

I would recommend the Level 2 course to anyone, no matter your age or experience it is a very comprehensive course, I chose this course as I had no idea where in IT I would like to aim for, this course gave me the basics on so many directions I could take. The tutors are friendly and approachable too.

**since providing this case study, Clare has gone on to obtain a Distinction in her apprenticeship with us, and has obtained a permanent position with a new employer.*
