

IT CAREER BUILDER PROGRAMME CASE STUDY

James Clarke

Job Title: IT Helpdesk Analyst

Employer: Global Accounting Firm

Why did you want to get into the tech industry?

Before enrolling in the course, I worked as a Digital Marketeer for 12 years. Despite some success, the market stagnated after Covid, and opportunities for advancement were limited. With a natural knack for IT, I decided to explore this career path.

How was your experience with the IT Career Builder course and what did you enjoy most?

Discovering JBC training, I initially hesitated to commit 8 weeks, but as I learned more about the curriculum and its potential, it seemed ideal for securing an entry-level IT position.

What will the Level 2 Diploma do for you and your career goals?

What sets this course apart is its focus beyond IT skills. It includes essential job search preparation, ensuring participants have polished CVs, interview responses, and cover letters before completion. My new role as an IT helpdesk analyst for a global accounting firm aligns perfectly with the Microsoft cloud technology I learned in the course.

Would you recommend the IT Career Builder Level 2 Diploma?

Absolutely, Thanks to the course! I landed an IT job within 3 weeks of finishing. The attentive trainers genuinely cared about our career growth, distinguishing JBC from other training providers.
