

IT CAREER BUILDER PROGRAMME CASE STUDY

Tizz Palmer

Job Title: Learner Support Technician

Employer: JBC Skills Training Ltd

Why did you want to get into the tech industry?

I have always loved tech and its fast-paced growth. I can trace my interest back to the 80's, when I had my first home computer, a 'Dragon 64' that ran on DOS and had no GUI and I played Frogger for hours on end. Selling my very first item on eBay in May 2000. Having a friend, who worked in IT for the NHS, but was living on the beach in Bali. Being inspired by my two sons; one who's been travelling since leaving university 8 years ago, working many of those years online to fund his travels and the other, who has worked single mindedly to pursue a career in the tech industry and is currently working as a network engineer in defence.

I guess, in short you could sum up my desire to work in the tech industry by a desire to work in a fast paced, exciting environment, that provides the ability and flexibility to work remotely. Freedom to explore and the opportunity to learn and its potential for personal and job growth.

How was your experience with the IT Career Builder course and what did you enjoy most?

My experience was fantastic! At times, it was hard work requiring lots of effort and time to develop new skills and learn new knowledge, but the tutors are with you, every step of the way providing support and encouragement.

The two things I enjoyed the most were being inspired to push my tech education beyond the course and explore new knowledge (I am currently learning how to use PowerShell). The second was an afternoon session, with one of the tutors, Stefan Gheorghe. This motivational session will have you believing in yourself and reaching for the stars. Not to be missed!

What will the Level 2 Diploma do for you and your career goals?

It has changed my life! I am now currently employed at JBC Skills Training as a Learner Support Technician.

Would you recommend the IT Career Builder Level 2 Diploma?

Absolutely! If you have a passion for tech, need to update or develop your tech skills or want to kickstart your career in IT, then this intensive 8-week course is the perfect place to start. With determination, drive and motivation, this course can change your life!
