

IT CAREER BUILDER PROGRAMME CASE STUDY

Mihaita Gabriel Gutanu

Job Title: Postperson with Driving

Employer: Royal Mail

Why did you want to get into the tech industry?

I want to get into the tech industry because it is my passion, from a young age back home I was the person to come to if you had any problem with the computer or the software. I was happy I could help somebody with the little knowledge I had. I wanted to know more about computers and technology, but my parents could not afford to buy me a computer or to have access to the internet. Most of this I did know because I was visiting my friends who had a computer and internet access, and I could learn as much as could about the computer.

How was your experience with the IT Career Builder course and what did you enjoy most?

Joining the JBC course was the best thing that happened to me, to be honest, I was working in construction, and I was looking to change my job because I found out I had a hernia not a genuinely wonderful thing. I enjoyed this course as I acquired new skills and learned more about the tech industry as it is rapidly developing. Being on this course helped me to get more confident in my technical and soft skills which I did not know I had. I was looking back to my old CV to see the difference from my new CV, what I learned to tailor down to the specific things, and with the help and support from the tutors (Stefan, Mosh, Michel and everyone else).

What will the Level 2 Diploma do for you and your career goals?

Having the Level 2 Diploma is going to help me to get started in the tech industry and I can work toward my dream of getting into ethical hacking as this is the field in which I am more interested.

Would you recommend the IT Career Builder Level 2 Diploma?

Yes, I did recommend this course already to some of my friends and family members.
